PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate and Full-Stack Developer with hands-on experience building and deploying scalable web applications and AI-based solutions using Java, Python, JavaScript, and React.js. Strong foundation in REST API design, relational database management, machine learning, and network security. Proven ability to independently manage the complete software development lifecycle. Quick learner with strong problem-solving, analytical thinking, team collaboration, and communication skills eager to contribute to a professional engineering team.

EDUCATION

B.Tech in Computer Science Engineering, VIT-AP University, Amaravati Aug 2023 – May 2027 CGPA: 7.96
Intermediate (MPC), Govt Junior College Jun 2021 – Mar 2023 85.4% | 10th Standard, Matrix High School Mar 2021
GPA: 10.0

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML5, CSS3, JavaScript, SQL **Frameworks:** React.js, Node.js, Tailwind CSS, MediaPipe, OpenCV

Database: MySQL, Firebase, JDBC **Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Linux, Postman, Vercel

Concepts: OOP, Data Structures, Algorithms, REST APIs, DBMS, MVC Architecture, Machine Learning, CNN, Deep Learning, Feature Engineering, Network Security, Test Cases

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability, Self-Learning, Attention to Detail, Time Management, Critical Thinking, Initiative

PROJECTS

WearYourStyle — AI-Powered Fashion Marketplace Feb 2026 – Mar 2026

- Engineered a production-ready full-stack AI fashion marketplace using **React.js, Node.js, Python, and Firebase** as sole developer; structured codebase across 10+ modules following MVC architecture and REST API design principles.
- Built a real-time virtual try-on system using **MediaPipe and OpenCV** for human pose estimation and body segmentation, reducing manual product visualization effort by 60%.
- Implemented **JWT-based authentication**, WebSocket real-time communication, and cloud-based media storage supporting a scalable multi-user architecture.
- Wrote test cases to validate core API endpoints and authentication flows, ensuring application reliability before deployment.
- GitHub: WearYourStyle | Live: Demo

Expense Tracker Web Application

Jan 2025 – May 2025

- Developed a full-stack personal finance management application using **React.js, Node.js, and Supabase** enabling real-time tracking of 100% of income and expense transactions with dynamic categorization, filtering, and an analytics dashboard.
- Utilized **Supabase** PostgreSQL backend with efficient CRUD operations and real-time data sync, improving query response time and data reliability.
- Implemented secure session-based authentication and access control via **Supabase Auth**, ensuring data privacy across all user accounts.
- GitHub: Repo | Live: Demo

Portfolio Website

Jun 2025 – Jul 2025

- Built a fully responsive personal portfolio using **HTML5, CSS3, and JavaScript** with cross-browser compatibility across 5+ screen sizes and optimized page load performance.
- Deployed on a custom domain with zero downtime; applied responsive design techniques and smooth navigation for improved user experience.
- GitHub: Repo | Live: Demo

RESEARCH WORK

Robust Deepfake Video Detection Using CNN-Based Spatial Features and Temporal Consistency Analysis 2026

- Designed an end-to-end deepfake detection pipeline using **CNN** for spatial feature extraction and temporal consistency analysis; built preprocessing frame extraction, face detection, feature fusion, and binary classification; benchmarked on **FaceForensics++ dataset** using data augmentation and transfer learning.
- Status:** Manuscript under review / Publication pending. GitHub: Repo

ML-Based SDN DDoS Detection

2025

- Built an **ML-based intrusion detection system** for DDoS classification in Software Defined Networks using supervised algorithms and traffic flow feature engineering; achieved measurable accuracy gains and reduced false-positive rates over rule-based baselines on real-world datasets.
- Status:** Manuscript under review / Publication pending. GitHub: Repo

CERTIFICATIONS

Oracle OCI AI Foundations (95%) | Java Full Stack Developer – Imarticus | AWS Cloud Foundations | Wadhvani Foundation | GitHub Foundations Certification

ACHIEVEMENTS

- Active LeetCode problem solver with consistent practice in Data Structures and Algorithms.
- Built and deployed 3+ full-stack and AI-based projects independently, covering the complete software development lifecycle.
- Achieved GPA 10.0 in 10th Standard and 85.4% in Intermediate; authored 2 research papers in ML and network security, both under review for publication.
