PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate and Full-Stack Developer with hands-on experience building and deploying scalable web applications and AI-based solutions using Java, Python, JavaScript, and React.js. Strong foundation in REST API design, relational database management, machine learning, and network security. Proven ability to independently manage the complete software development lifecycle. Quick learner with strong problem-solving, analytical thinking, team collaboration, and communication skills eager to contribute to a professional engineering team.

EDUCATION

- **VIT-AP University** Andhra Pradesh, India
Bachelor of Technology in Computer Science and Engineering — **CGPA: 8.20** 2023 – 2027
- **Government Junior College** Telangana, India
Higher Secondary Education (MPC) — **Percentage: 85.4%** 2021 – 2023
- **Matrix High School** Telangana, India
Secondary School Education — **GPA: 10.0** 2020 – 2021

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML5, CSS3, JavaScript, SQL **Frameworks:** React.js, Node.js, Express.js, Tailwind CSS, MediaPipe, OpenCV, TypeScript

Database: MySQL, Firebase, JDBC **Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Linux, Postman, Vercel, Docker

Concepts: OOP, Data Structures, Algorithms, REST APIs, DBMS, MVC Architecture, Machine Learning, CNN, Deep Learning, Feature Engineering, Network Security, Test Cases

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability, Self-Learning, Attention to Detail, Time Management, Critical Thinking, Initiative

PROJECTS

WearYourStyle — AI-Powered Fashion Marketplace Feb 2026 – Apr 2026

- Built a full-stack AI fashion marketplace using **React.js, Node.js, Python, and Firebase**.
- Designed RESTful APIs following MVC architecture for scalable backend development.
- Developed a virtual try-on system using **MediaPipe** and **OpenCV**, reducing manual visualization by 60%.
- Implemented **JWT authentication**, WebSockets, and cloud storage for secure real-time communication.
- Wrote 15+ API test cases and deployed the application on Vercel with GitHub integration.
- GitHub: WearYourStyle | Live: Demo

Expense Tracker Web Application

Jan 2025 – May 2025

- Developed a full-stack finance tracker using **React.js, Node.js, and Supabase**.
- Implemented CRUD operations with PostgreSQL for secure transaction management.
- Added analytics dashboard with filtering, categorization, and real-time data synchronization.
- Integrated **Supabase Auth** for secure authentication and role-based access control.
- Optimized database queries to improve response time and application performance.
- GitHub: Repo | Live: Demo

Smart Resume Screener — AI-Powered Resume Analysis Platform

July 2026 - Aug 2026

- Developed an AI-powered resume screening platform to automate **resume analysis, candidate evaluation, and job-role matching**.
- Implemented automated **resume parsing and information extraction** to identify candidate skills, qualifications, experience, and relevant keywords.
- Built a **job description matching** workflow to evaluate resumes against role-specific requirements and identify suitable candidates.
- Designed an ATS-oriented screening process using **keyword matching, skill analysis, and candidate scoring** to streamline recruitment workflows.
- Developed a responsive web interface focused on **usability, automation, and efficient candidate screening**.
- GitHub: Smart-Resume-Screener | Live: Demo

RESEARCH WORK

Robust Deepfake Video Detection Using CNN-Based Spatial Features and Temporal Consistency Analysis 2026

- Designed a deepfake video detection pipeline using **CNN-based spatial feature extraction** and **temporal consistency analysis**, with frame extraction, face detection, feature fusion, data augmentation, and transfer learning.
- Evaluated the approach on the **FaceForensics++** dataset; **Paper Presented at IEEE AIDML-2026**, August 2026. Certificate | GitHub

ML-Based SDN DDoS Detection

2025

- Developed an **ML-based intrusion detection system** for DDoS classification in Software Defined Networks using supervised learning and traffic-flow feature engineering.
- Evaluated ML models on network traffic datasets with focus on **classification accuracy and false-positive reduction**. GitHub

CERTIFICATIONS

Oracle OCI AI Foundations (95%) | Java Full Stack Developer – Imarticus | AWS Cloud Foundations | Wadhvani Foundation | GitHub Foundations Certification

ACHIEVEMENTS

- Active LeetCode problem solver focused on **Data Structures and Algorithms**.
- Built and deployed **3+ full-stack and AI-based projects** independently.
- Presented research on **Deepfake Video Detection** at **IEEE AIDML-2026 (Certificate)**.
